Emerging Data Analyst and Data Science postgraduate with hands-on experience in SQL, Python, Power BI, Tableau, dbt, Snowflake, BigQuery and Databricks. Experienced turning raw operational data into decisions stakeholders trust — from dashboard development and data validation to business reporting and plain-language communication with non-technical audiences. Strong interest in consulting, modern cloud analytics platforms, and AI-driven data solutions.

EXPERIENCE

Data Analyst | Databeat | Hyderabad, TS

February 2023 – December 2023

- Used Python and SQL to clean, transform, and analyse business datasets for reporting and dashboard development.
- Built and supported Power BI dashboards to track KPIs, trends, and operational performance for business stakeholders.
- Drove a 4% revenue uplift by optimising product-catalog accuracy using SQL, NER (NLP) and CNNs for data-driven rules, automated through Apache Airflow and SageMaker.
- Cut ad-hoc reporting requests by 40% by building reusable data pipelines, models and dashboards with Airflow, Presto, Redshift and MicroStrategy, and lifted user conversion 8% via real-time BigQuery and DAX-driven Power BI analysis.

Data & Operations Analyst | Janata Diagnostic | Hyderabad, TS

February 2022 – February 2024

- Analysed patient, billing, booking and operational data to support day-to-day reporting and management decisions.
- Prepared structured reports using Excel and SQL-based extraction to identify trends in patient flow, service demand and revenue, and validated data across patient, billing and reporting files.
- Translated operational data into clear insight for non-technical stakeholders, including clinic staff and management.
- Tracked website and digital performance using Google Analytics and SEO reporting metrics.

Computing & Data Tutor | Tutor Lim | Sydney, AU

February 2024 – Present

- Tutor students in computing, data handling and structured problem-solving.
- Explain complex technical topics in simple language for non-technical learners.
- Review student work for logic, accuracy and completeness — similar to a QA/validation workflow.
- Recognised as a top-performing tutor for strong student outcomes and consistent positive feedback.

PROJECTS

The Tariff Tax — Who Pays? | Data storytelling dashboard | Team project

- Built and deployed a Streamlit + Plotly data narrative on U.S. tariff policy, leading a 15-stage pipeline across FRED, Yale Budget Lab and Census sources — surfacing that the bottom 10% of earners lose 3.2x more income share to tariffs than the top 10%.

LLM-Powered Data Analysis Assistant | Sydney, AU | Jan 2026

- Built a prototype AI assistant using Python, SQL and LLM prompting that cleans data, runs exploratory analysis, and answers natural-language questions with visual summaries.

StudyMate | NLP-driven study companion | Aug 2025 – Oct 2025

- Built a Streamlit app that turns lecture notes and PDFs into summaries, quizzes, flashcards and deadline extraction using NLTK/spaCy and GPT-4o.

EDUCATION

Master of Technology, Data Science | University of Technology Sydney

Expected December 2026 · Data Visualization & Narratives, Machine Learning Algorithms & Applications, Deep Learning

Bachelor of Technology, Computer Science | JNTUH

January 2020 – June 2024 · Database Management Systems, Big Data Analytics, Design & Analysis of Algorithms

SKILLS

Modelling & ETL/ELT: SQL, dbt, data modelling, data validation & reconciliation, Apache Airflow

Cloud & platforms: Snowflake, BigQuery, Databricks, Microsoft Fabric (in progress), Azure, AWS SageMaker

BI & visualization: Power BI, Tableau, Looker, DAX, MicroStrategy, data storytelling

Programming & ML: Python (Pandas, NumPy, Scikit-learn), NER, CNNs, LLM prompting, REST APIs

Other: GitHub, Jupyter Notebook, VS Code, Agile collaboration, stakeholder engagement

CERTIFICATIONS & TRAINING

- Microsoft: PL-300 Power BI Associate, Fabric fundamentals & data warehousing · EY Technology Risk Simulation (Forage) · Salesforce Data Analytics Fundamentals — In progress
